HYDR**PRO**

Blending science with *nature*

EXTENSIVE, ENDURING HYDRATION WITH EXTENDED ACTIVITY

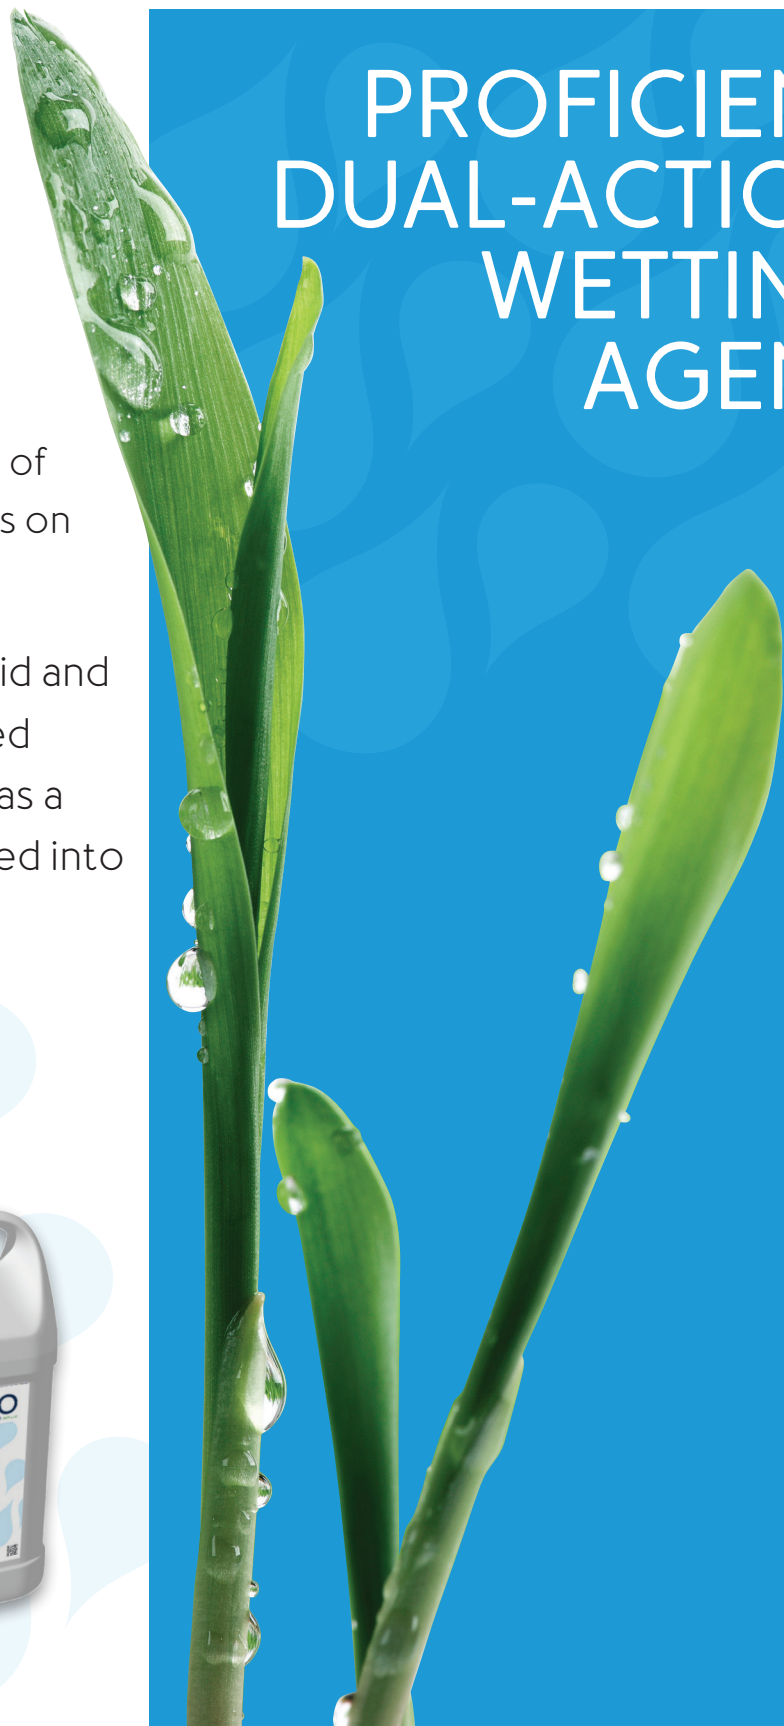

Complete solution
for your turf and
landscape areas.

HYDRPRO**** is leading the way in water conservation products. Able to provide the highest concentration of actives, it is one of the most advanced wetting agents on the market.

HYDRPRO**** comes in both liquid and granular forms. It is easily applied directly whilst watering, added as a topdress, or readily incorporated into soil mixes.

PROFICIENT
DUAL-ACTION
WETTING
AGENT

Made in Australia to successfully counter weather extremes and overcome hydrophobic soil conditions.

VISIBLE RESULTS

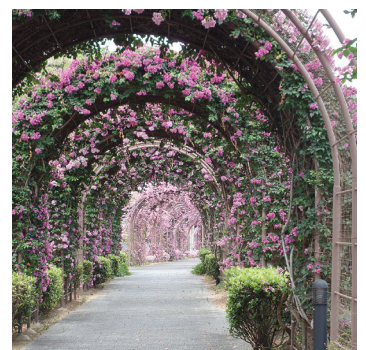

- Higher quality and healthier turf with deeper, stronger roots
- Inhibits the growth of moss, algae and soil-borne disease microbes
- Diminishes dry spots
- Helps prevent wilting

PRODUCT BENEFITS

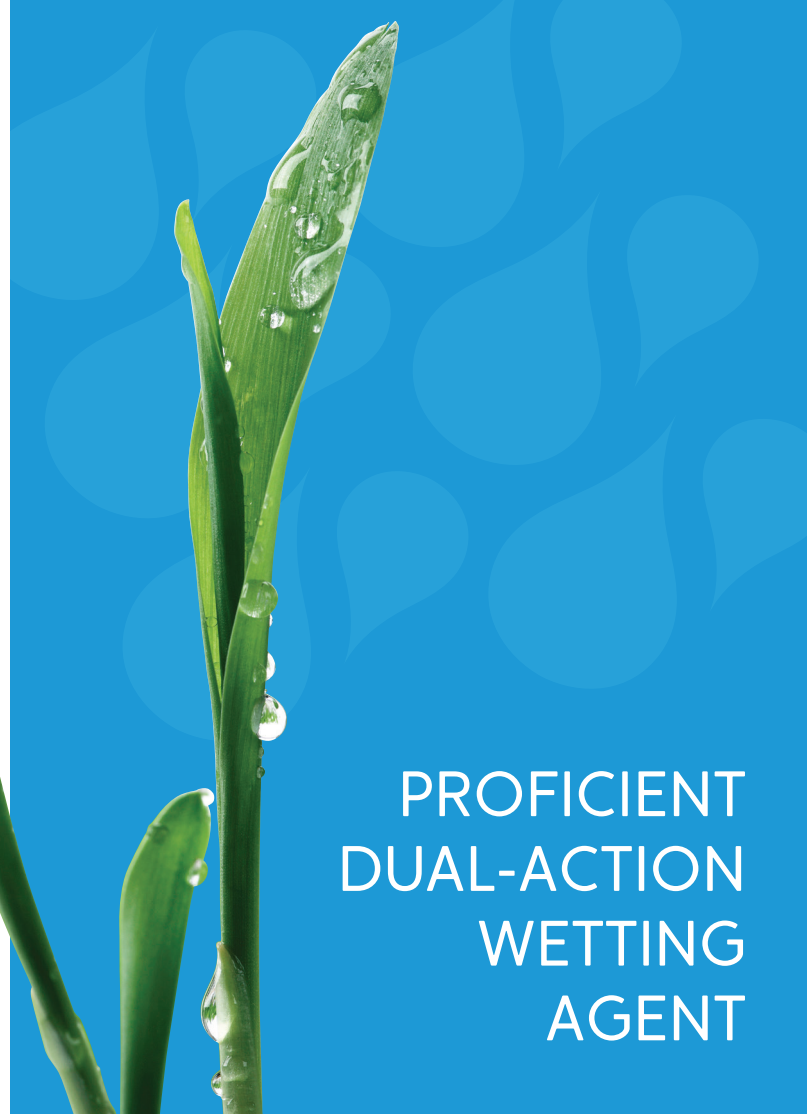

- Reduces surface tension
- Decreases irrigation requirements
- Watering infiltrates the entire root zone
- Draining saturated soils as well as re-wetting dry soils (dual-action)

FLEXIBILITY

- Can be used in conjunction with fertilisers and pesticides
- Works quickly and effectively with all soil types
- Concentrated products for lower application rates

EXTENSIVE, ENDURING HYDRATION WITH EXTENDED ACTIVITY

APPLICATION RATE FOR TURF APPLICATION

- Apply granules once a season at 20-25g/m² or bi-monthly at 10-15g/m² with 4-6mm water

Please refer to ultranaturals website for detailed application rates for both the granules and liquid concentrate, including application rates for fairways, sports turf, etc.
